

GETTING YOU THERE. SMARTER.

» Committed to Customer-Focused Solutions

CUBIC[®]
Advancing Mobility Together™

OUR MISSION

At Cubic Transportation Systems, we know that there's more to journeys than just the destination. That's why we are passionate about creating a more connected world by applying technology to help transportation agencies and municipal partners deliver seamless, integrated, and efficient mobility solutions that simplify daily commutes, reduce traveler frustration, and make journeys safer—all while helping transportation agencies and communities realize their public equity objectives. At Cubic Transportation Systems, we're committed to getting you there, smarter. It's been our mission for nearly five decades.

WHAT WE DO

For us, transportation is personal. We know that every journey matters, no matter how long or short. That's why the team at Cubic Transportation Systems helps transportation authorities and transit agencies design, integrate, deploy, and manage mobility systems fit for the challenges of tomorrow.

We work alongside our transportation partners to understand their needs, objectives, and budgets while helping them build modern mobility systems to manage demand and congestion, make journeys safer, and empower travelers to make informed and preferred travel choices.

Our **urban revenue management solutions** help agencies modernize their fare collection systems, including software and hardware, to give customers a convenient, simple way to pay for all modes of travel, however they choose—through mobile payments, contactless, or account-based ticketing. No matter how complex your fare model is, our versatile back-office makes fare capping simple, so everyone always gets the best price for their trip.

Our **intelligent transportation solutions** allow us to deploy adaptive traffic systems that gather and interpret data to help cities actively prevent congestion, make real-time network adjustments, and improve safety for vulnerable road users.

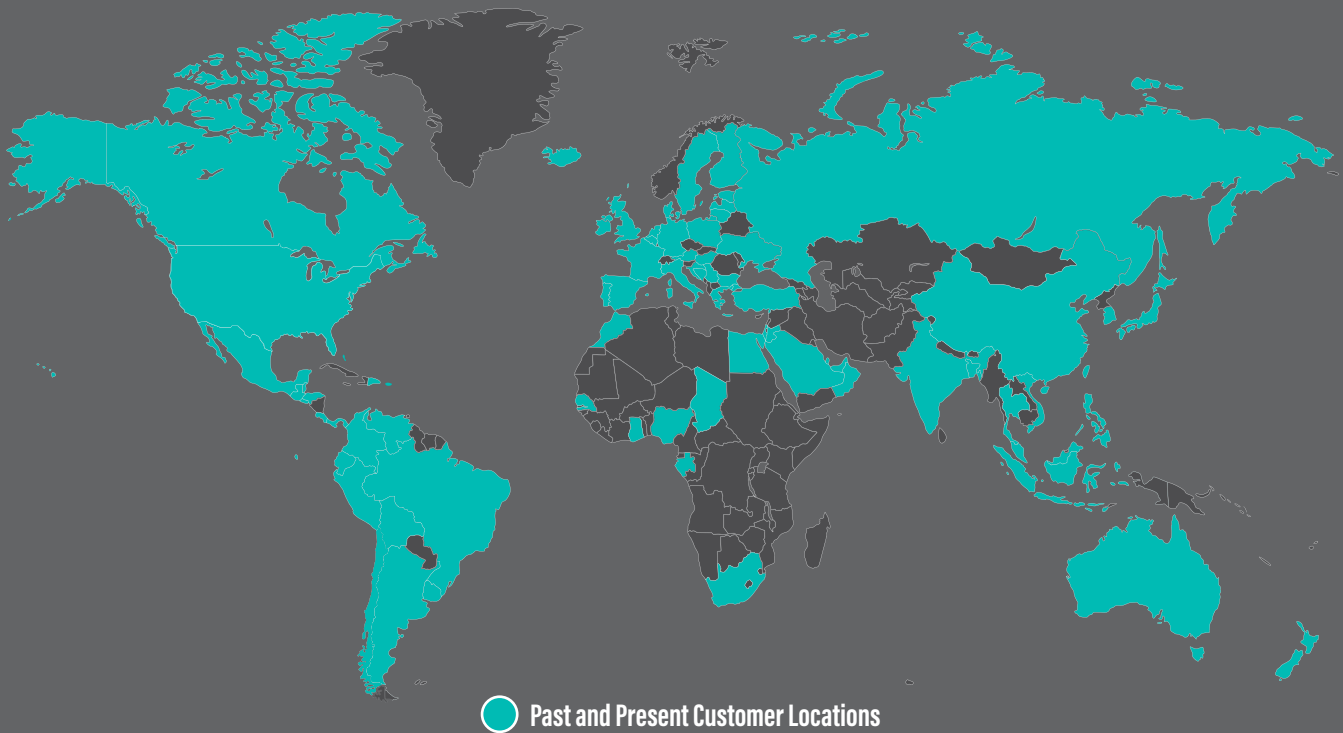

Our **road user charging solution** offers a one-stop-shop for congestion management and revenue collection, offering efficient, accurate, and low-cost collection of revenue for user journeys.

Our **scalable digital platform-based technology** helps agencies simplify multi-modal journey planning, fare collection, and customer rewards, integrating them into a single, easy-to-manage mobile application that allows agencies to modify, incentivize, and improve customer experience. The platform approach and Software-as-a-Service model enables everyone from the smallest bus operator to the largest regional transport authority to deliver a reliable transit experience for their communities.

Together, they deliver an integrated customer experience and integrated operations and analytics. Our solutions deliver intelligent and actionable information to ensure your networks are running as smoothly and efficiently as possible, empowering your travelers to make smart, informed decisions based on facts.

MOVING MILLIONS OF PEOPLE SAFELY AND EFFICIENTLY

Whether you're after a small-scale cloud-based, real-time passenger information system, a regional congestion management platform, or a complex traffic management system for urban networks delivered in an as-a-Service model, we're here to support you and your customers—every step of the way. Our solutions are scalable to ensure we're the right-sized partner for any job, from rural communities like Eugene, Oregon, and Merida, Mexico to urban metropolises like London, New York City, Sydney, and Singapore.

With over 1,500 transportation projects across every continent under our belt and a network of convenient, locally-based offices with dedicated support teams, we have the technology and the know-how to solve your mobility challenges.

But don't just take it from us. Hear from our local partners who entrusted us with their mobility needs. We've worked with partners from all transportation modes, including transit agencies, airports, highways, intersections, and corridors across small communities, metropolitan cities, and regional authorities. When you're done, get in touch to learn more and see how we can work together to help your transportation network deliver on the promise of co-creating the city of a better tomorrow.
